Today's Briefing

Operational Status: Safe to Sail

What's Happening: For today, September 22, 2026, at 08:00, the waters are calm and safe for navigation. You can expect gentle wave heights around 0.9 meters with a comfortable water temperature of 29.0 degrees Celsius. The tide level is at 0.84 meters above mean sea level. There are no gale-force winds or thunderstorms detected, making it a stable morning to head out.

Livelihood and Safety Advice: Since you are operating a mechanized trawler, keep a careful check on your diesel fuel reserves for the return trip, and ensure your trawl-net operating depth and winch gear remain clear. A very important safety warning for today: your intended position has crossed into international waters, so please watch your navigation boundaries closely and stay well clear of major offshore shipping lanes to avoid any collision risks.

If you are looking for good fishing grounds today, we have live data pointing to several favorable zones nearby based on today's rich nutrient levels and warm waters. The top spots to consider are Satpati, Vasai, and Dahanu, all showing strong potential with good water conditions. Additionally, our offline archive notes a promising fishing zone near Ratnagiri, which is about 20.67 kilometers away from your current coordinates. Safe voyage, and good luck with the catch today.
