Today's Briefing

Operational Status: Safe to Sail

What's Happening: Good morning. Looking ahead to today at 8:00 AM, conditions are calm and stable. The water will be comfortably warm at about 30.6 degrees Celsius, wave heights will be low at around 0.64 meters, and the tide level will be 1.21 meters above average sea level. There are no gale-force winds or thunderstorms predicted for that time.

Please note a critical safety warning from our tracking systems: your current location or planned route has crossed into international waters, so keep a close watch on your positioning as you head out.

Livelihood & Safety Advice: Since the seas are gentle, it is safe to go out today. If you are looking for a good catch, live readings show high potential for fish concentrations nearby. The closest rich fishing water is near Versova, about 21.8 kilometers away, showing strong biological activity with a water temperature of 30.1 degrees Celsius. Other highly favorable areas nearby today include Vasai, Dahanu, and Satpati, with Satpati currently showing particularly high concentrations of marine life and plant nutrients in water at 30.3 degrees Celsius. Set your course carefully, stay within safe territorial bounds, and have a successful and safe trip.
